Rave Alert™

Reach Your Employees in Three Clicks

Build a Resilient Organization with Critical Communications Delivered in a Matter of Seconds

Rave Alert, the leading critical communications employee platform, is proven to help organizations deliver unlimited messages to unlimited recipients with an easy-to-use interface accessible from any Internet-connected device.

- During any business disruption, anyone can communicate in three clicks via text, email, voice, IPAWS-OPEN, internal websites, public address systems, desktop alerts, digital signage and more.

- Keep lists accurate and up-to-date with automated data management.

- Rave Alert's unmatched performance sends more than 3,000 SMS messages per second and 1 billion messages a year.

QUICKLY REACH YOUR EMPLOYEES THROUGH MULTIPLE MODES OF COMMUNICATION

COMMUNICATE WITH YOUR MOBILE WORKFORCE

ENSURE SAFETY AND SECURITY FOR ALL STAFF
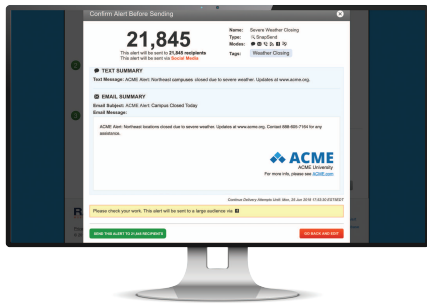

BREAK DOWN INTERNAL COMMUNICATION SILOS

SEND GEO-TARGETED NOTIFICATIONS WORLDWIDE

RECEIVE AUTOMATIC WEATHER NOTIFICATIONS FROM THE NATIONAL WEATHER SERVICE

RAVE
MOBILE SAFETY

EASY-TO-USE INTERFACE

Any user can send a Rave Alert™ with the right message to the right recipient at the right time from any Internet-connected device. It only takes three clicks to send a CAP-compliant Rave Alert via text, email, voice, IPAWS-OPEN, PA/intercom systems desktop alerts, sirens and digital signage — simultaneously. This ensures your targeted audience receives your messages immediately.

The confident send screen and template protection have built-in safeguards to reduce human error and ensure a false alarm doesn't disrupt your business operations.

Rave Alert's interface is tested by thousands of organizations and is proven daily. Most administrators can be trained in under two hours, while users with fewer access permissions can be trained in a matter of minutes.

UNMATCHED PERFORMANCE AND RELIABILITY

With three clicks, Rave Alert sends messages to your entire database in a matter of seconds. Our customers send 1 billion notifications annually at delivery speeds in excess of 3,000 SMS messages per second.

Rave's public safety grade infrastructure of multiple carriers, carrier networks and aggregators, and geo-redundant data centers, ensures top emergency notification system performance and delivery.

SUPERIOR DATA MANAGEMENT

Automatically keep your data current and accurate. Rave Alert offers automated "set it and forget it" data management with ongoing, proactive freshness checks. For data synchronization across your systems, our Smartloader accepts CSV files, regardless of origin, and Web APIs that allow real-time updates of your data within Rave Alert. Your organization can be up and running in hours. It's that easy.

"Rave Alert has been well-received by our employees. Our employees read texts more than emails and they want to know about weather-related closings and other emergencies. Rave Alert helps us keep our employees informed with rapid notifications."

UNLIMITED INTERNAL AND EXTERNAL COMMUNICATIONS

Rave Alert is built for company-wide critical communications, as well as ongoing targeted communications. There is no limit to the number of administrators, lists or messages you can send, making Rave Alert the perfect solution for department-level communications.

Its geo-polling feature allows you to solicit staffing requests or volunteer signs-ups through simple poll questions via SMS, email and voice calls. If you need to quickly mobilize a team, Rave Alert's conference bridge connects everyone within one click of a button.

Rave Alert's SMS Opt-In feature enables people to easily sign up for alerts by texting a keyword or a short code. Now, everyone at your facility can be notified of an emergency without adding them to your database. You can also set expiration dates to automatically remove temporary staff, visitors, contractors and anyone else who only needs to receive notifications for a limited amount of time.

GREATER ENGAGEMENT WITH A CUSTOM-BRANDED MOBILE APP

Rave Alert can send geo-targeted push notifications to the custom-branded Rave Guardian™ app. In two steps, employees are automatically authenticated and can update their personal information in Rave Alert. Rave Guardian provides additional ways, such as routed chats, confidential tips, a call directory, a safety timer and a content portal, for employees to engage more with your organization.
