

Coronavirus Response Solution to Keep Your Organization Informed

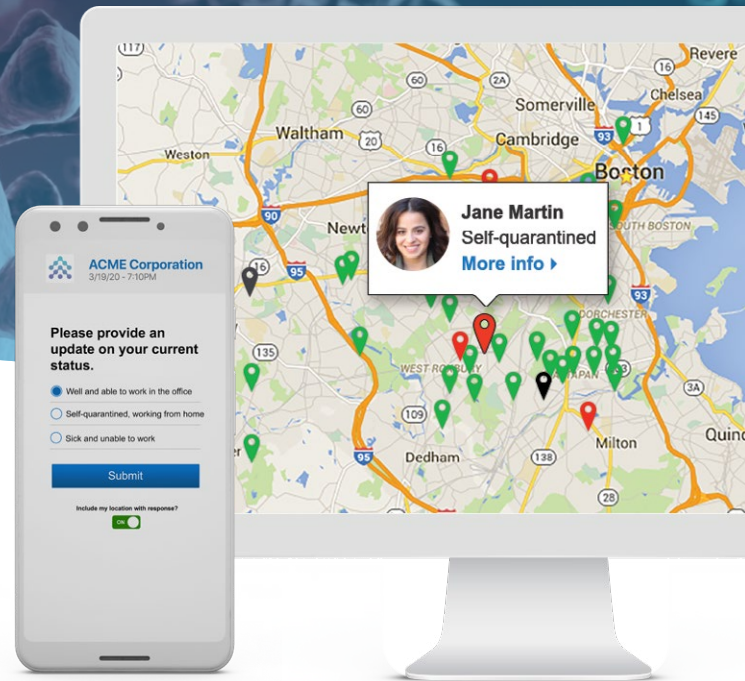

Enhance your ability to monitor and quickly communicate changes about the ongoing COVID-19 pandemic to your employees

*Organizations that maximize employee safety and minimize operational disruption throughout the **COVID-19 pandemic** will be those that most effectively share and collect accurate information. The **Rave Alert™ incident notification system**, and integrated **Rave Guardian™ application** provide the tools you need to communicate and collect critical information across your organization.*

Improve Your Response Posture

Broad Communications. Reach your employees in just three clicks to provide the information needed to inform them of the latest happenings around the virus. Share updates on the status of your organization and provide customizable content, such as health tips, emergency procedures and other preparedness instructions for your organization.

Emergency Outreach. Keep your organization informed of office closures, travel bans or cautions, or emergency plan activations in a matter of seconds while providing continuous updates on available resources.

Business Continuity. Easily manage and conduct communications to cover shifts with available, and healthy, employees to keep your organization running as usual. A polling feature allows you to ask simple questions and receive location-based responses until a task is complete.

Quarantine Check-Ins and Health Conditions. Ensure the safety and security of employees with automated messages to those who may be in quarantine. Provide them with the proper guidelines to confirm their compliance, while providing real-time feedback on the changing risk of the virus.

Employee Engagement. Communicate with mobile and traveling employees to ensure they are up to date on what is going on at headquarters. Deliver push notifications directly to all or to a targeted group within a specific location.

Rave Guardian™ Application Features

Chat – inbound text communication to share HR-, travel- or facility-related information and answer employee questions.

Call Directory – create and easily manage a directory of critical numbers, such as Benefits, Travel, or a coronavirus hotline, to provide employees with the contact details of those that can help.

Customizable Content – share timely, appropriate and accurate information immediately so employees do not have to search for what they need.
