

New! SwiftK12 School Notification System

SwiftK12 is the next generation of Alert Solutions' award-winning school notification system.

Compatible with your Student Information System (SIS), SwiftK12 helps school administrators communicate more effectively with parents, students and staff members.

- ✓ **Social Media Integration**
Enables administrators to automatically post alerts to school Facebook and Twitter accounts
- ✓ **Detailed Message Delivery Reporting**
Real-time access to message delivery details at individual school and/or district level – available in graphical and statistical formats
- ✓ **Multi-Language Translation**
Automatically translate text-to-speech voice and text-to-text email messages into the recipient's preferred language
- ✓ **Multi-Channel Messaging**
Reach hundreds and thousands of individuals quickly and reliably
- ✓ **Parent Call-Back Hotline**
Never inundate your front office with parent call backs again by allowing parents to listen to previously sent alerts on the hotline
- ✓ **Parent Portal**
Allows student families to review past messages, view and edit contact information, as well as set communication preferences
- ✓ **SIS Integration**
Create a seamless sync between your Student Information System and SwiftK12 to ensure access to up-to-date contact info
- ✓ **Emergency Quick Alert Tool**
Ideal for sending urgent school alerts to all recipients at once

Learn about the SwiftK12 modules:

PDF Builder Module

Reduce paper, ink and postage costs by sending important documents to student families. This feature isn't just for report cards, either. Email any PDF student report and track in real-time!

SwiftK12 Mobile App

SwiftK12's Mobile App was specially developed to allow school alerts and parent notifications to be sent directly from any iOS or Android device via email, voice, SMS text and social media.
