

# Rave Alert – Extension for WebEOC

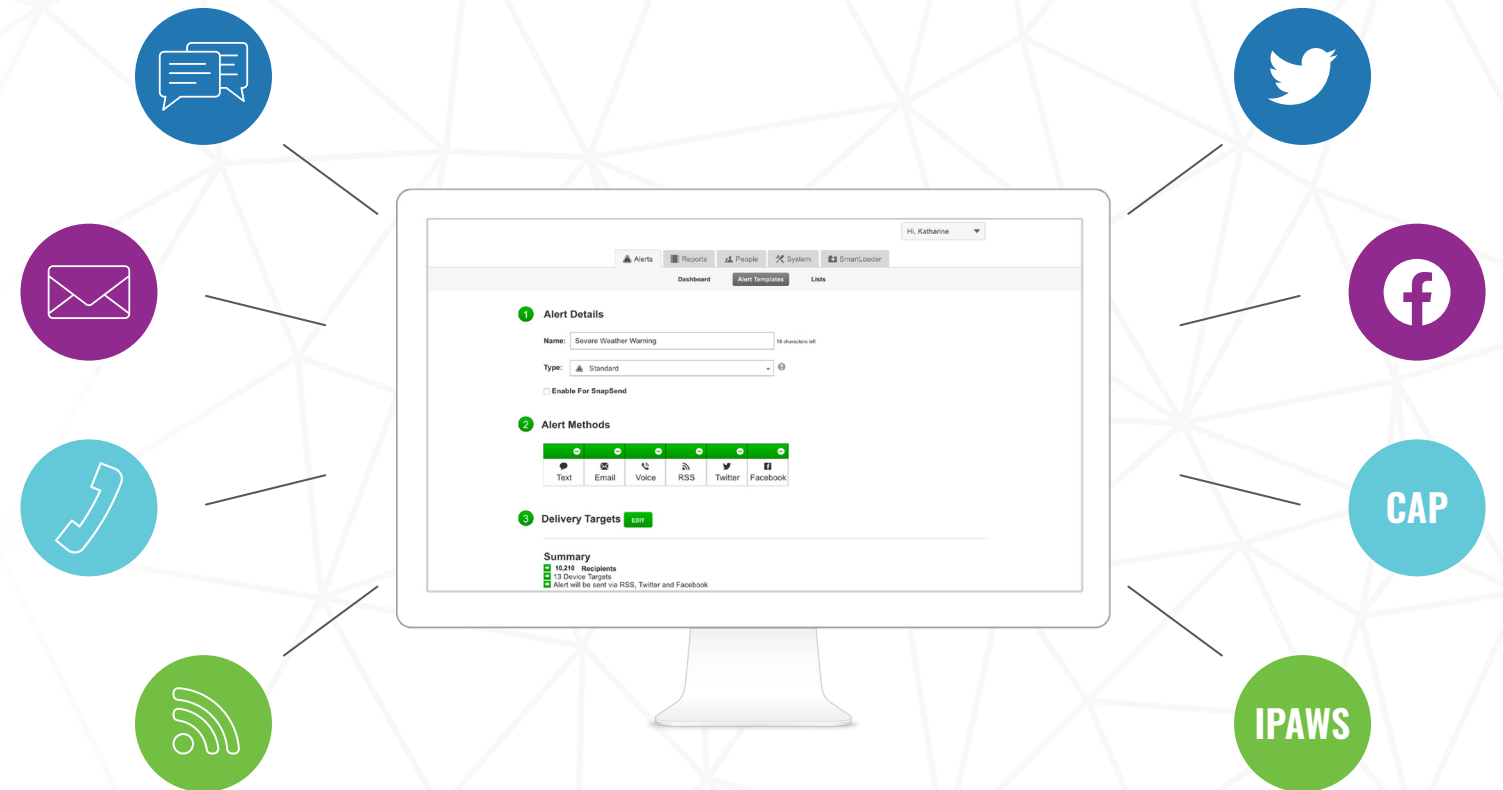

The WebEOC Rave Alert integration streamlines procedures, reduces the complexity of notifications, and automatically collects searchable historical data. The hybrid platform is easy to use and simplifies information input and sharing. Upgrade today for an integrated, automated, and efficient system that allows you to:

- 1 Send alerts faster without having to leave WebEOC.
- 2 Deliver notifications across all channels - SMS, voice, email, desktop, social media, and more.
- 3 Deliver the right message to the right person when and where they need it most.
- 4 Inform employees and external constituents beyond WebEOC users.

# SAVE TIME WITH STREAMLINED PROCESSES

- Simplify your internal and external incident communication by allowing users to add multimodal communications and mass alerting into their WebEOC workflow.
- Easily access Rave Alert, the preferred mass notification system integrated with WebEOC, through Single Sign On.
- Take your emergency notifications to the next level, from critical event management to day-to-day operations. Having a separate emergency notification system from WebEOC causes delays and prevents the rapid sharing of information in an emergency.

# LEVERAGE A TRUE WEBEOC INTEGRATION

# SIMPLIFY AND TRUST EMERGENCY NOTIFICATIONS

**Keep your employee contacts accurate.** Rave Alert autoloads and auto-updates contact lists directly from WebEOC and HR databases.

**Leverage real-time success metrics.** Detailed reports show recipient response information and help strategically improve alert effectiveness.

**Customize access controls.** Authorize who can send messages to specific groups and use specific tools.

**With Rave, you are doing all you can to provide critical information to the people that need it when they need it. Take emergency notifications to the next level with the WebEOC integration for the most critical unplanned situations. Rave is easy-to-use, easy-to-deploy, and high-performing – trusted to work every time and keep people safe.**

*“Rave’s ability to integrate with Intermedix WebEOC has taken emergency notification to the next level. Rave Alert is a great product standing alone but now is an exceptional product for any Emergency Operations Center. The ability to capture event data and notification data in one application saves time for the end user.”*
